

Please read the manual thoroughly and make sure you follow these instructions step by step to make sure you proceed in the easiest way possible.

- 1** Remove frame, brackets and table top from carry bag.

- 2** Carefully extend the frame. This can be done by two people standing opposite each other and walking away from each other or by one person walking round the frame extending out in smaller amounts. The sliding joints will work there way up the legs and the locating buttons will click into place.

- 3** Fit the brackets onto the counter and the shelter leg as shown. Tighten with the fixing giving a secure fitting.

- 4** Open out the folding counter top and locate in the securing holes.
